

TRUCK & TRANSPORT

EUROL.COM

You rely on the deployment of your fleet. Preventing downtime is important, as is cost savings and reducing environmental impact. We understand the challenges and are here to support you. Our lubricants not only protect your fleet but also contribute proven benefits to better business operations.

We produce a wide range of lubricants, cleaners, coolants, and additives for the truck and transport industry. Our range includes OEM-specified products for engines, gearboxes, transmissions, and hydraulic systems. We also have specialist lubrication solutions for truck parts such as fifth wheels, final drives, chains, and tail lifts.

Enter the brand and type of truck on our oil advisor and you will immediately receive appropriate product advice.

Eurol Specialty producten

Drawing on our deep expertise in application, we've developed the Eurol Specialty lubricants using SYNGIS Technology. This cutting-edge technology synergizes lubricating and protective qualities, delivering superior performance in even the toughest conditions. Choosing Eurol Specialty products translates to improved efficiency, significant cost reduction, increased productivity, and a minimized environmental impact. Our team is ready to schedule a live demonstration to showcase these advantages in action.

SIGNIFICANT SAVINGS FIFTH WHEELS

Eurol Specialty Grease CS-2/502-S reduces wear and keeps the fifth wheel turning smoothly. The grease stays in place and does not leak off. As a result, the grease lasts longer, is more durable in use, and therefore less harmful to the environment. Gert-Jan Grobbink, Equipment Manager, Bolk Transport: “We have about 150 trucks equipped with a fifth wheel. The use of Eurol Specialty grease has led to significant savings on fifth wheels for us, as we don’t need to install a new fifth wheel midway through the life of a truck.”

Performance:
50% less wear

No need to replace fifth wheels

Product:
Eurol Specialty Grease CS-2/502-S

REDUCED DOWNTIME SLIDING PARTS

Van den Boogaard, specialists in heavy transport, recovery, and crane rental, has been using Eurol Specialty Grease CS-2/103-S for the sliding parts of the machinery and Eurol Specialty CS-2/502-S for the hydraulic cylinders, including for 17 auto loading cranes, since 2019. Niels Struik, Workshop Manager, Van den Boogaard Beverwijk: “In addition to the reduced frequency of lubrication, there has also been a significant decrease in the amount of lubricants needed. The total annual savings thanks to the use of Eurol Specialty lubricants amount to thousands of euros.”

Performance:
600% longer lubrication interval

Reduced downtime due to maintenance

Increased availability of equipment and personnel

Eurol Specialty Grease CS-2/502-S

ABOUT EUROL

We are a Dutch family business, active since 1977, with a passionate team and a modern production environment. Our products are available in more than 90 countries and in various segments including heavy duty, agri, industry, automotive, and racing. For commercial and technical support, Eurol offers Dealer and Service Point formulas, extensive digital tools, and the dedication of our specialists. This ensures that customers worldwide are guaranteed the best products, excellent service, and maximum returns on lubricants.

Dakar Winning Quality

The Dakar Rally has been an ultimate testing stage for our products for years. Our collaboration with international racing teams contributes to the further development of our products. Partly thanks to the use of the Eurol Specialty racing line, multiple Dakar victories have been achieved.

Use the interactive lubrication points tool to see which products we offer for the most essential parts of your truck and trailer.
